EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest the limitations of a context-based audio queue for storing a current context, and a speech recognition engine for recognizing and registering commands, wherein tags designating an audio context are ignored unless the context is established. It is known in the prior art (e.g. *Wynblatt et al.* and *Ladd et al.* ('317)) to utilize tags for browsing web pages written in a VoiceXML programming language for speech recognition and speech synthesis. However, Applicants' Specification discloses an HTML tag called "CONTEXT", which can be set to "OPTIONAL" or "IGNORE", and determines how much of a web page will be read back for a speech recognition command, e.g. an entire page or just one or two paragraphs. Thus, a web page is read back from the top for a repeat command unless a context is specified. (See Specification, Page 8, Line 4 to Page 11, Line 11; Page 13, Line 23 to Page 14, Line 22) The prior art of record does not disclose or reasonably suggest a tag designating an audio context that can be ignored unless the context is established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
